

Swiggy Business Analytics Case Study

Scenario
You have recently joined Swiggy as a Junior Data Analyst. Your manager has shared the customer, restaurant, and order databases. Your task is to analyze the data and answer the following business questions using SQL.

Tables	
1. Customers	2. Restaurants
CustomerID	RestaurantID
CustomerName	RestaurantName
City	Cuisine
Membership	City
	Rating

3. Orders

OrderID
CustomerID
RestaurantID
OrderAmount
DeliveryPartner
OrderDate
OrderStatus

1.

How many total orders have been placed on the platform?
2.

What is the total revenue generated by Swiggy?
3.

What is the average order value across all orders?
4.

Which are the Top 5 highest-value orders placed by customers?
5.

Which city generated the highest revenue for Swiggy?
6.

Which restaurant generated the highest total revenue?
7.

Which cuisine is the most popular based on the number of orders received?
8.

Which delivery partner completed the highest number of successful deliveries?
9.

Which customers have spent more than the average order value?
10.

Find the second highest order amount placed on the platform.
11.

Which restaurant has the highest average customer rating?
12.

Which cities generated revenue greater than ₹2,000?
13.

Which customers have never placed an order?

(Use LEFT JOIN)
14.

Which restaurants have never received any orders?

(Use RIGHT JOIN)
15.

Display each customer's order details, including Customer Name, Restaurant Name, Cuisine, Order Amount, and Order Status.

(Use Multiple INNER JOINS)
16.

Categorize every order as Budget, Medium, or Premium based on the order amount.

(Use CASE WHEN)
17.

Rank customers based on their total spending on Swiggy.

(Use RANK())
18.

Assign a unique serial number to every order based on the order amount from highest to lowest.

(Use ROW_NUMBER())
19.

Rank restaurants based on the total revenue they generated. If two restaurants have the same revenue, they should receive the same rank without skipping the next rank.

(Use DENSE_RANK())
20.
Final Business Report

Prepare a report answering the following management questions:

- Which city should Swiggy focus on for expansion?
- Which restaurant is the best-performing partner?
- Which cuisine should be promoted more?
- Who are the top 5 most valuable customers?
- Which delivery partner deserves a performance bonus?
- What is the average customer spending per order?
- Which restaurants need improvement based on ratings?
- What percentage of orders were cancelled?
- Which city has the highest average order value?
- Based on your analysis, suggest three recommendations to improve Swiggy's business.
